Ankit Sanjay Gupta

ankitgupta37937@gmail.com | +91 9833250407
github.com/An415111 | linkedin.com/in/ankit-gupta018

Skills

Languages: JavaScript, Python, C++, Java.
Technologies & Tools: HTML, CSS, Node.js, Express.js, MongoDB, SQL, Data Structure and Algorithm.

Projects

Music Application (Musico)
Musico website link | *GitHub*

- Developed a full-stack music streaming web application where users can explore songs, create playlists, and enjoy seamless music playback.
- Implemented secure user authentication system with signup, login, and email OTP verification.
- Built backend APIs using Node.js and MongoDB to manage users, songs, and playlists efficiently, including admin controls for adding and deleting songs.
- Integrated Cloudinary for storing and managing media files such as songs and images.
- Designed a user-friendly and dynamic interface using EJS for smooth navigation and better usability.
- Developed playlist functionality to create, update, and organize songs.
- Enabled real-time music playback with interactive controls like play, pause, and playlist management.

Tech Stack: Node.js, Express.js, MongoDB, EJS, HTML, CSS, JavaScript, Cloudinary.

Telegram Bot (Assistify)
Assistify website link | *GitHub*

- Developed a business support system using Telegram Bot API to automate customer communication and order handling.
- Built a fully functional Telegram Bot using TypeScript and Telegram Bot API.
- Designed structured and type-safe backend architecture.
- Implemented automated product listings and order handling system.
- Developed command-based interaction system (/start, /order, etc.).
- Integrated database for storing customer and order data.
- Added admin controls for managing products and responses.
- Implemented input validation and error handling using TypeScript interfaces.

Tech Stack: TypeScript, Node.js, Telegram Bot API, MongoDB.

Color Application (Color Game)
Live Demo | *GitHub*

- Developed an interactive color guessing web application using Node.js, Express.js, and EJS for dynamic rendering.
- Implemented random RGB color generation logic with real-time user feedback for correct and incorrect selections.
- Built server-side routing using Express to manage multiple endpoints and render views efficiently.
- Designed a clean and user-friendly interface using HTML, CSS, and JavaScript to enhance user experience.
- Integrated static file handling using Express middleware for optimized asset delivery.
- Deployed the application on Render and managed version control using Git and GitHub.
- Implemented dynamic DOM manipulation and event handling to update game state and UI interactions in real-time.

Tech Stack: Node.js, Express.js, EJS, HTML, CSS, JavaScript.

Education

THAKUR SPECIALIZED DEGREE COLLEGE
B.Sc in Computer Science
2024 – Present | Mumbai
C.G.P.A: 9.63

MAHARASHTRA BOARD, PUNE
H.S.C
2024 | Mumbai
Agg: 56.67%

S.S.C
2022 | Mumbai
Agg: 70.80%

Courses & Certifications

- *AWS Cloud Practitioner Course Completion*
- *Codeathon Stranger Codes Intercollegiate Coding Competition*
- *NxtWave Buildathon Participation Certificate*
- *Course Completion of Python*
- *NxtWave AI Workshop*

Co-Curricular Activities

- Participated in coding competitions and technical workshops.
- Strong interest in software development and problem solving.
